

Sleeping across Europe.

Night Train Network Destinations 2023

- 6-7 days a week
 - 3-5 days a week
 - 1-2 days a week
 - seasonal only
 - starting this year (hopefully)
 - important seat-only connections
- Interrail/Eurail

Why opt for a night train?

With a 28 times lower climate impact compared to air travel (EU average statistics), night trains are the most sustainable way to travel longer distances - while enjoying the scenery over breakfast and saving an overnight hotel stay.

Missing the night train you want?

Then join us! We are campaigning to expand this network with more, better, cross-border and long-distance night train connections - by promoting night train travel and lobbying for better conditions - both for operators and customers.
